

SAVIO®

WHO WE ARE ?

Elmak, the owner of the Savio brand, was established in 1990. It is a producer of remote controllers, LED lighting, and electronic controllers for household appliances. We are based in Rzeszow, Poland where we design, test in the laboratory, and produce all products.

In 2011 Elmak created a new branch – Savio, responsible for selling electronic devices, headphones, gaming equipment, etc. Savio products meet the highest quality standards thanks to the cooperation of both departments and the substantial support of experienced electronics engineers.

Savio performs thorough tests on products checking all their technical and functional parameters, paying particular attention to safety issues. We record the results of each test. Based on the results, we decide on possible optimization of production methods.

TECHNOLOGY ALWAYS AT HAND

We create the Savio Brand – young people from Rzeszow, Poland, with a positive attitude towards the world. We are geeks when it comes to new technologies.

We have created our brand so we can introduce quality goods to the market.

We want to give the world modern, reliable products at a reasonable price.
Thanks to hard work and positive feedback, you can find Savio in many big retailers in Poland and hundreds of internet stores.

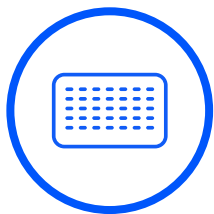

Now our goal is to discover new opportunities outside the Polish border.

PRODUCT CATEGORIES

20

During over 10 years of the brand's existence.
